Subject
TexCom Gulf Disposal Amended Draft Permit WDW410

History:
This message has been replied to.

Jose,

As a follow up to our phone conversation, attached is the proposed amended draft permit WDW410 that the TCEQ executive director has filed with the State Office of Administrative Hearings (SOAH). Please refer to new Section V. titled "Recompletion Requirements" (page 2).

The amended draft permit clarifies that recompletion, testing, a completion report, and executive director approval prior to operation will be required for the existing well (proposed WDW410). Please refer to 30 TAC §§331.45 and 331.65. Specifically, §331.45(1)(E) requires the executive director, in making a determination whether to grant approval, to review the results of the injection zone and confining zone testing program as required in §331.62(7) and §331.65(a) for compliance with the standards of Chapter 331. Section §331.45 (Subchapter C) and §331.65 (Subchapter D) may be viewed via the following website:
[http://info.sos.state.tx.us/pls/pub/readtac\\$ext.ViewTAC?tac_view=4&ti=30&pt=1&ch=331](http://info.sos.state.tx.us/pls/pub/readtac$ext.ViewTAC?tac_view=4&ti=30&pt=1&ch=331)

This project is currently under the jurisdiction of SOAH. The next step in the process is for the SOAH judges to file their Proposal for Decision (PFD) with the TCEQ commissioners. Then the PFD will be scheduled on a commissioners' agenda for their consideration and decision. We do not have a specific time frame for the PFD; however, we anticipate it may be some time this spring.

I hope this information will be helpful. Please contact me if you have further questions.
